Community model by 人人

When cultures collaborate

Olivier Brian brian@puzzle.ch

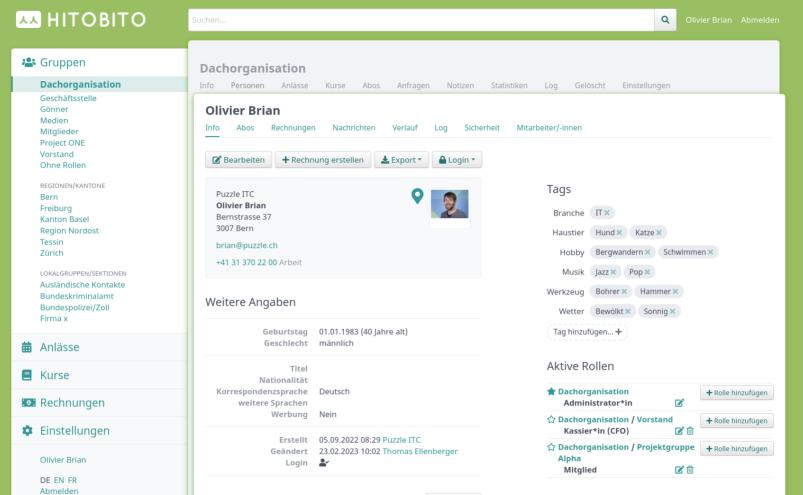

Agenda

- Why collaborate
- How to collaborate
- Hate or love to collaborate
- Succeeding or failing to collaborate
- Q&A

Lieber Olivier:

Ein neues Issue im GITHUB (dürfen wir eigentlich auch selber dort issues setzen?):

What is 人人?

Notizen + Neue Notiz

Hate or love to collaborate

What we love to do?

- Solutions which solve my problems
- New fancy features
- Impress others (?)
- All the easy things that make us happy

What we struggle with?

- Fixing bugs
- Update frameworks
- Recurring jobs
- Long-term returns and invisible outcomes

Open source business model

Value creation

- Values what «we love»
- Software integrations
- Services, customizations, support, training, hosting
- Skill based values

Challenges

- Values what «we struggle»
- OSS is «free» available
- Community driven

How will OSS development be financed in the long term?

Open source business model

Key Activities

- Software development
- Solutions
- Training
- Consulting
- Subscriptions

Cost Structure

- Staff costs
 - Engineering
 - Architecture / UX
 - Support
 - Project management
 - Supporting roles
- Direct costs
- Operations

Revenue Stream

- Initial projects
- Customer extensions
- Consulting
- Maintenance, support and operation contracts
- No licensing

Longterm OSS development

- Subscriptions
- Service level agreements
- Maintenance contracts
- Code, sweat and tears

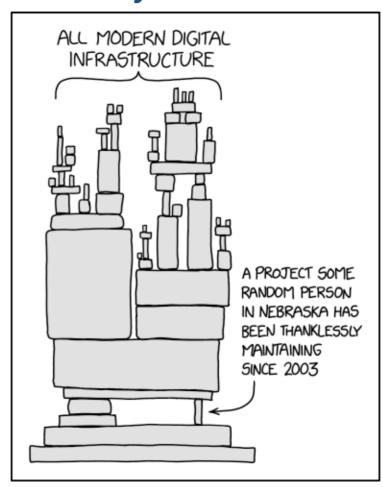

Our common goal: «No one should be fired for buying open source software»

Succeeding or failing to collaborate

Challenges

TIMMING FINANCIAL REQUIREMENT

Take away or homework
