

# **BAZEL, BUCK, AND FRIENDS. HOW TO SCALE YOUR BUILDS?**

Andreas Herrmann

Open Source @ Siemens — June 4th, 2025

# WHY?

<https://3d.xkcd.com/303>

# WHAT IS A BUILD SYSTEM?

- code → artifact
- Make, Ninja, Maven
- tests, dependencies, ...

## WHAT IS SCALABLE?

*Scalability is the property of a system to handle a growing amount of work.*

— Wikipedia

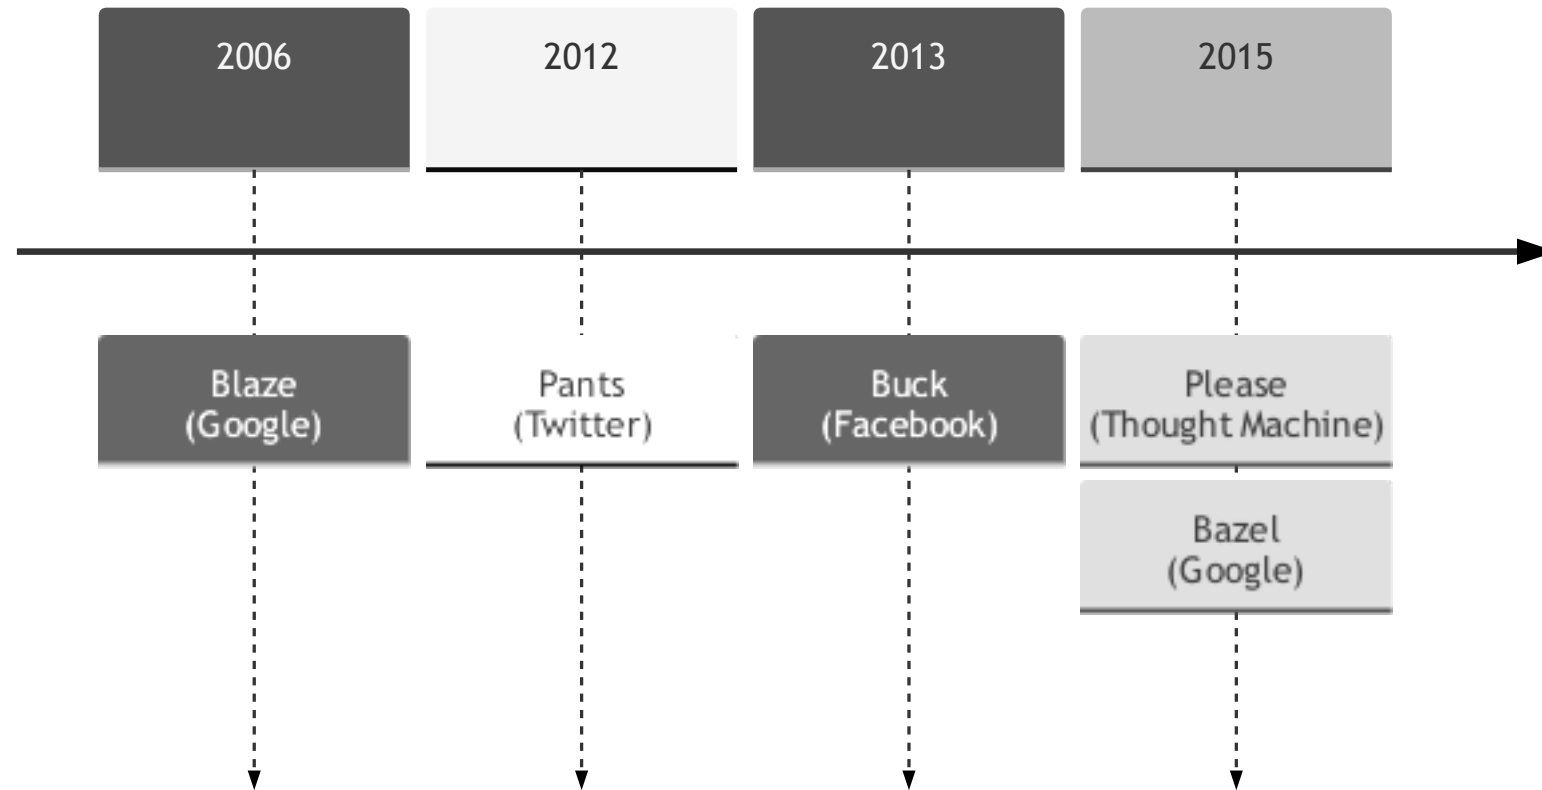

## SCALABILITY

- code size
- team size
- complexity

## SCALABLE BUILD SYSTEMS

- incremental
- distributed
- extensible
- fast feedback

# HISTORY

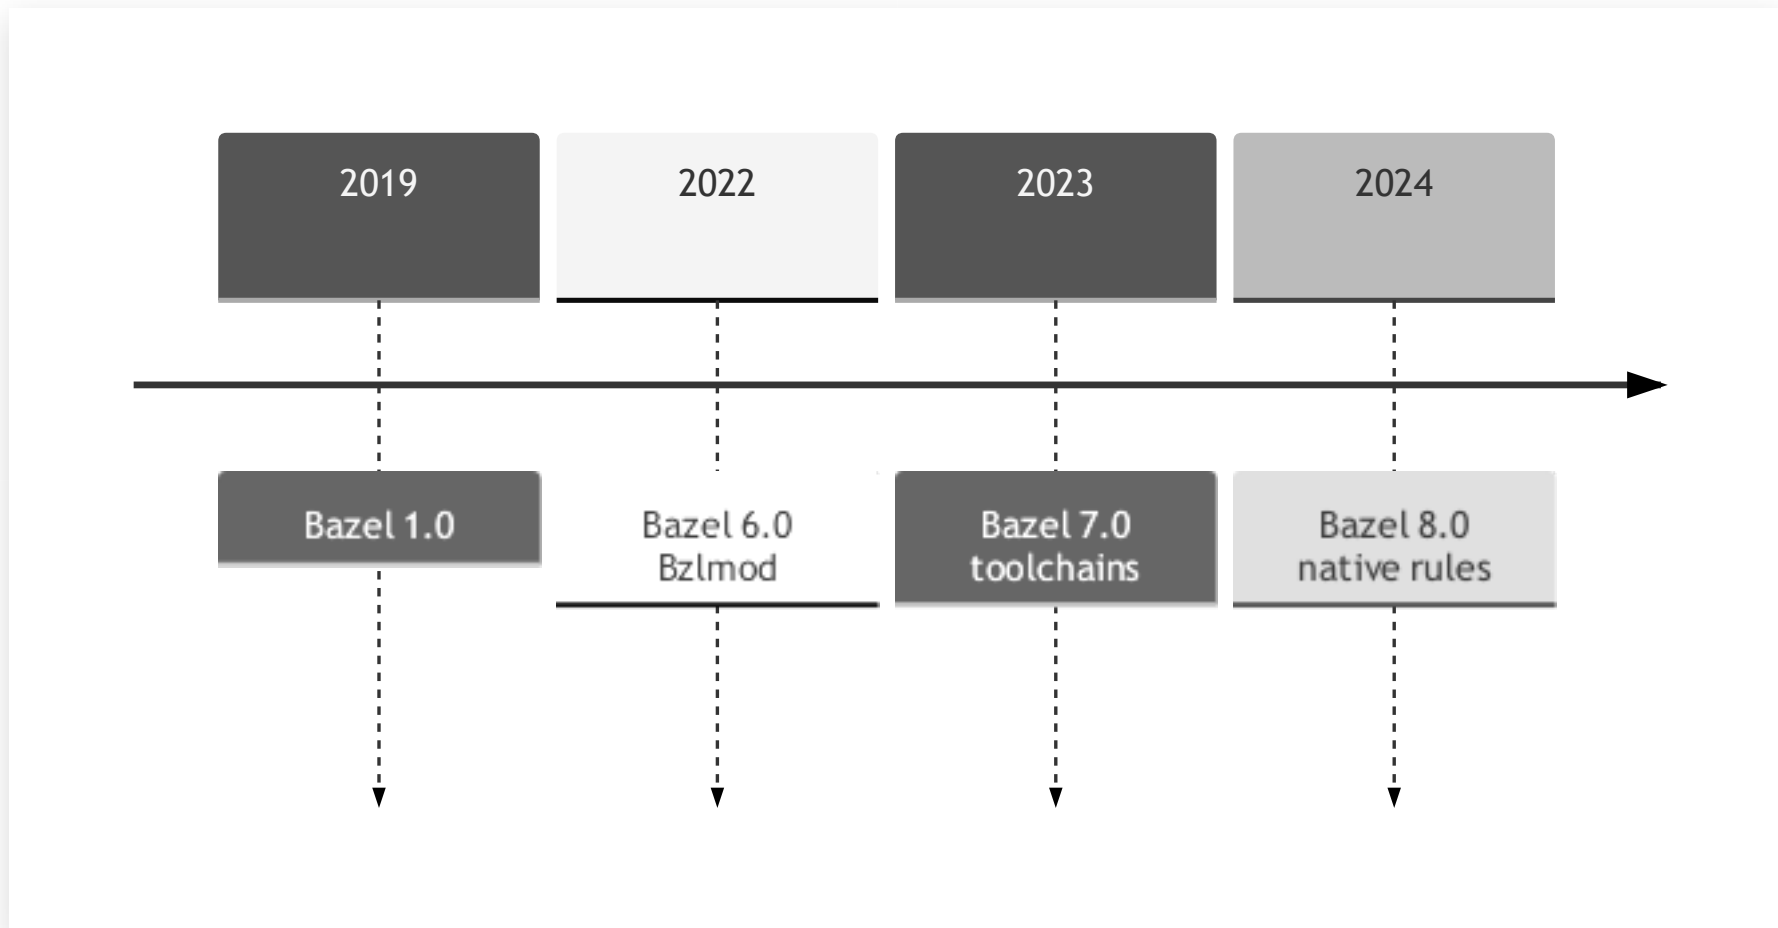

[Pearce 2013; Twitter 2016; Montgomery 2020; Vermeulen 2023; Nienhuys 2024]

## BAZEL EVOLUTION

[Lomov 2019; Yang 2023; Yang and Kumar 2023; Bazel Team 2025]

## NEXT GENERATION

[Weinberger 2020; Aehlig and Reiche 2022; Hopman and Mitchell 2023]

## FEATURES

## EXTENSIBLE

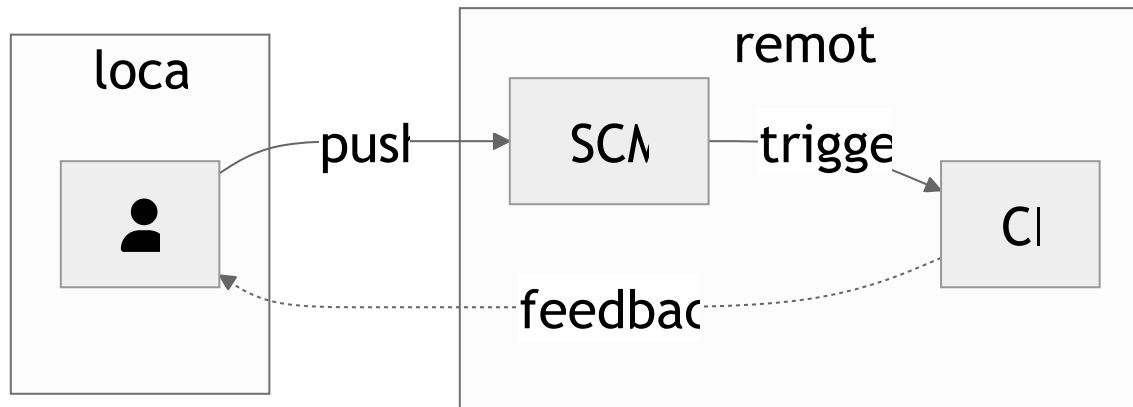

```
cc_library(name = "native_lib", ...)
genrule(name = ..., outs = ["bindings.py"], ...)
py_library(
    name = "py_lib",
    srcs = [":bindings.py"],
    deps = [":native_lib"],
)
py_test(
    name = "test",
    srcs = ["main.py"],
    deps = [":py_lib"],
    data = ["golden.out"],
)
```

## **DISTRIBUTED**

- distributed build
- shared cache
- common API
- cross platform

# CI PIPELINES

[Eagle 2023]

## CORRECT

- { Fast, Correct } — Choose two
- Correct → Fast
- Hermetic
- Explicit

# MONOREPO

- external dependencies
- unified & consistent
- continuous integration

**CHOICE**

# MIGRATION

- assess & plan
- incremental
- measure
- communicate
- help is available
